

EDUCATION

- **National Institute of Technology, Durgapur** West Bengal, India
Bachelor of Technology - Computer Science and Engineering; CGPA: 8.61 August 2023 - Present
- **National High School** West Bengal, India
Higher Secondary; Percentage: 88.6% April 2020 - May 2022

SKILLS SUMMARY

- **Technical Skills:** DSA, OOPS, OS, DBMS, CN, Machine Learning, Supervised & Unsupervised Learning, Neural Networks (ANN, CNN, RNN), LSTM, Transformers, Generative AI, High Level Design(HLD), Low Level Design(LLD)
- **Non-Technical Skills:** Problem Solving, Team Leadership, Project Management, Communication, Decision Making, Analytical Thinking, Creative Thinking, Time Management.
- **Languages:** C, C++, Java, Python, SQL, HTML, CSS, JavaScript.
- **Development Tools:** Git, GitHub, VS Code, Sublime Text, Google Colab, Jupyter Notebook.
- **Technologies/Frameworks:** Redis, React.js, Node.js, Express.js, Next.js, MongoDB, MySQL, NumPy, Pandas, LangChain.

PROJECTS

- **Echo ([Code](#))**:
 - Built a **real-time full-stack chat application** enabling instant messaging with **online/offline presence tracking** for enhanced user interaction.
 - Designed a scalable **MongoDB schema** for users, chat rooms, and messages, ensuring efficient data retrieval and relationship handling.
 - Implemented **Socket.io** for real-time **full-duplex communication** between client and server, ensuring low-latency message delivery.
 - Integrated **JWT authentication** and secure communication via **RESTful APIs** for protected user access and session management.
 - Tech Stack: **React.js, Node.js, Express.js, MongoDB, Socket.io, JWT.**
- **RAG PDF Chatbot ([Code](#))**:
 - Engineered a **full-stack RAG chatbot** enabling users to upload PDFs and query them using natural language with **context-aware AI responses**.
 - Built an end-to-end **RAG pipeline** with PDF parsing, text chunking, embedding generation using **Gemini API + LangChain**, and vector storage in **Qdrant**.
 - Developed an **asynchronous processing pipeline** using **BullMQ + Valkey** to handle PDF ingestion efficiently and avoid blocking requests.
 - Implemented **semantic vector search** to retrieve relevant document chunks, improving response accuracy and contextual relevance.
 - Tech Stack: **Next.js, React.js, Node.js, LangChain, Gemini API, Qdrant, BullMQ, Valkey, Clerk, Docker.**

ACHIEVEMENTS

- **CodeForces Expert** (Jan 2026): Max rating **1626**. [gourav_27](#)
- **CodeChef 4-Star** (Nov 2025): Max rating **1880**. [gourav_2027](#)
- **LeetCode Knight** (Dec 2025): **Top 4%** globally, peak rating **1889**. [profile](#)
- Solved **1700+** algorithmic problems across Codeforces, CodeChef, LeetCode, AtCoder, CSES & TakeUForward. [Codolio](#)
- Ranked **197th/47,800+** in CodeChef Starters 173; **771st & 837th/40,000+** in Codeforces Rounds 1072 & 1071.
- **Amazon HackOn 6.0 Finalist**: Top **28** of 300+ teams nationwide for "Second Life AI", an AI-powered returns lifecycle microservices platform, with Team CodeClashers.
- **AIR 17795** in JEE Mains 2023 (1.17M+ candidates); **Rank 1212** in WBJEE 2023 (100,000+ candidates).

POSITION OF RESPONSIBILITY

- **REcursion - National Institute of Technology, Durgapur**
Senior Coordinator January 2025 - Present
 - Taught Competitive Programming related concepts to second-year students in classes conducted weekly twice.
 - Currently mentoring **8** second-year students under the mentorship programme to refine their Competitive Programming and Logical Building skills.
 - Organized coding competitions every 3 months, with average participation of **200+** students.

INTERESTS

- Algorithmic Problem Solving (DSA and CP), Web Development, AI/ML and System Design(LLD + HLD).
